

CUSTOMER ANALYTICS | DUNNHUMBY – THE COMPLETE JOURNEY

Customer Insights & CRM Analytics

EXECUTIVE OVERVIEW

Customer value, engagement health and CRM reach across 2,500 households (2 years of data).

2500

Households

Unique households in dataset

£8.06M

Total Sales Value

Across all Transactions

£29.14

Overall Basket Value

Total sales + total baskets

140

Potential Lapse

5.6% of households

1584

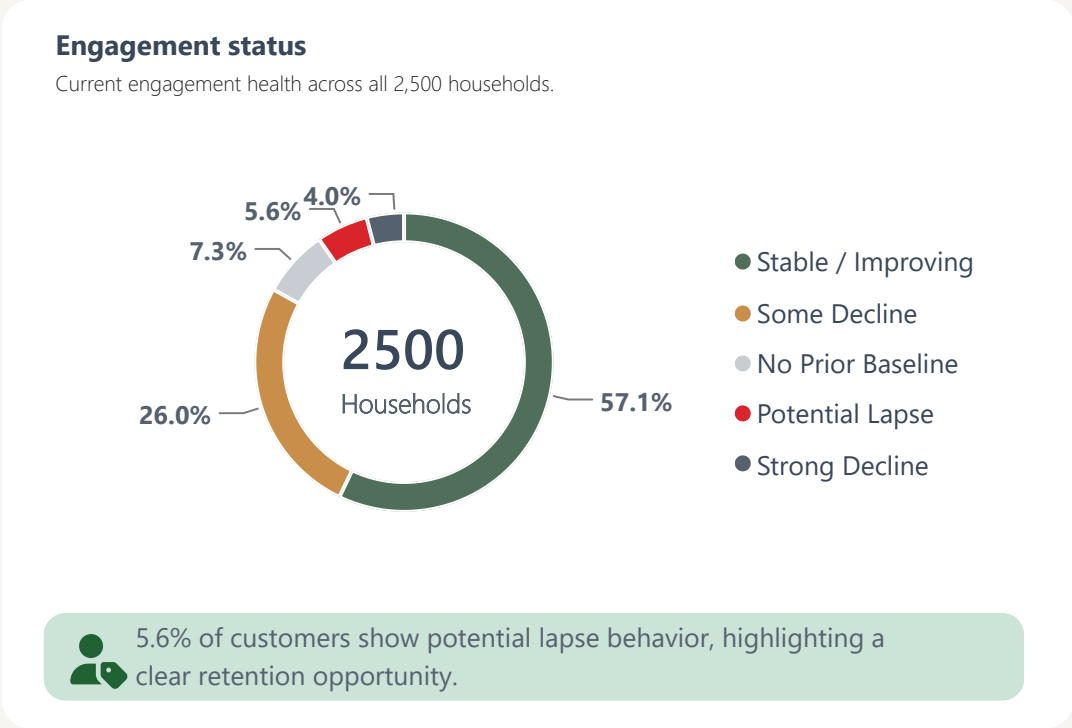

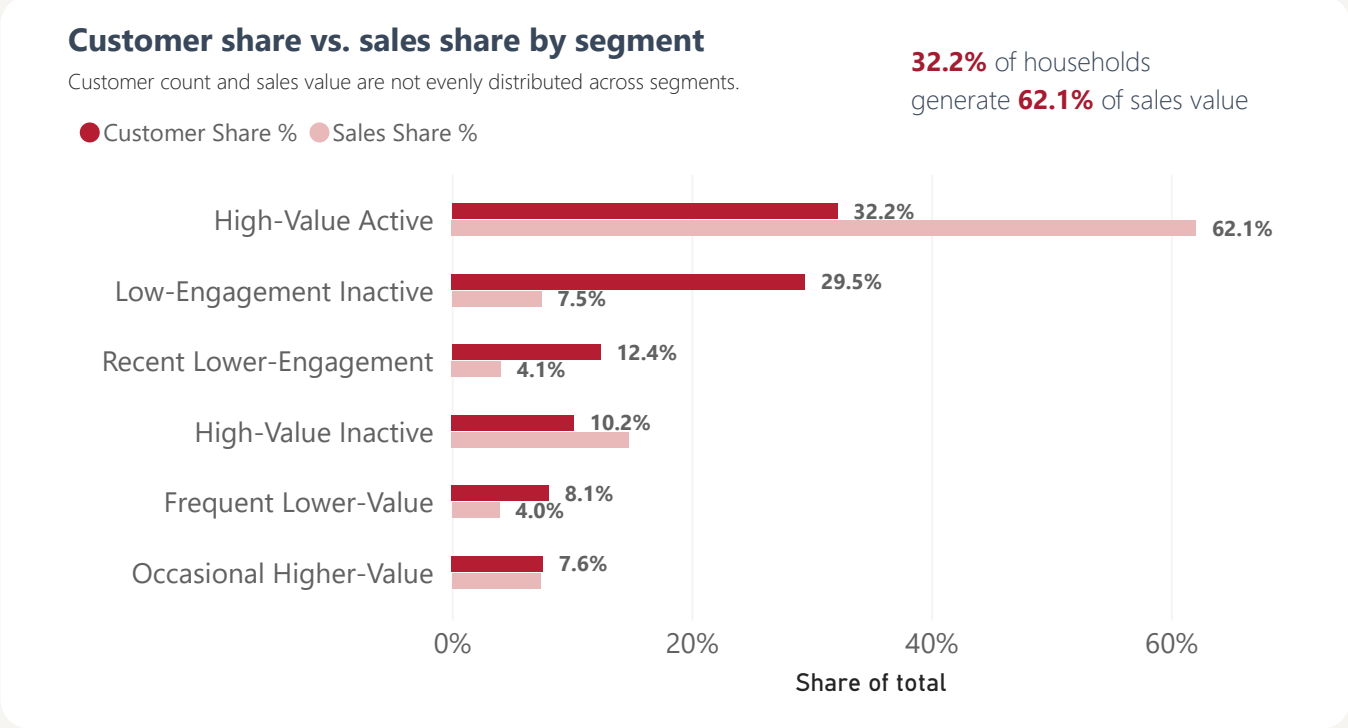

Campaign-Assigned

Households

434

Coupon Redeemers

Households

KEY INSIGHT 1

Value concentration

32.2% → 62.1%

High-Value Active households represent 32.2% of customers but generate 62.1% of total sales value.

KEY INSIGHT 2

Retention Priority

22.4%

High-Value Inactive has the highest potential lapse rate 57 of 255 households.

KEY INSIGHT 3

CRM engagement

1,584 assigned | 434 redeemed

1,584 households received campaign assignments, and 434 households redeemed at least one coupon.

Customer Segmentation

Understanding Different customer groups and how they shop

Six customer segments based on recency, shopping frequency and sales value (RFM).

Frequent Lower-Value

203
Households
8.1% of all households

High-Value Active

£325.8K
Total Sales Value
4.0% of total sales

High-Value Inactive

£14.84
Avg. Basket Value
vs £13.41 overall

Low-Engagement Inactive

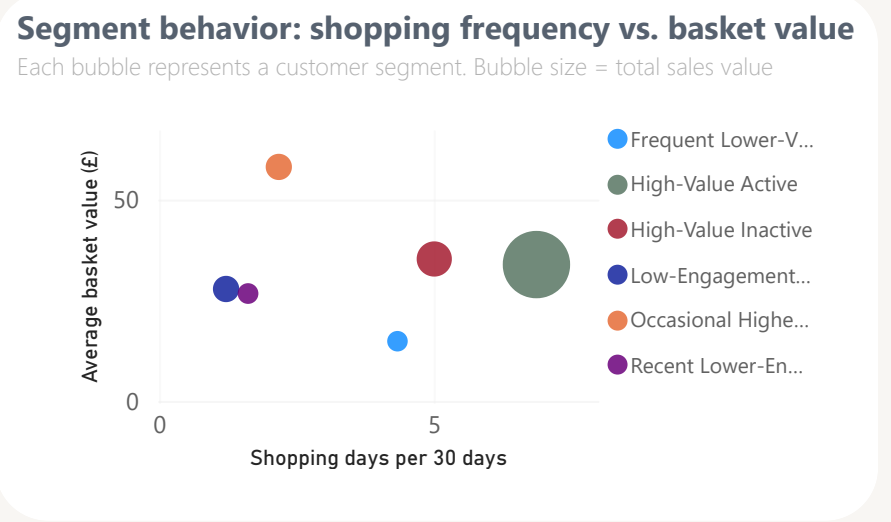

4.34
Shopping days /30 days
Average shopping frequency

Occasional Higher-Value

9.87
Avg. Recency (Days)
Average days since last purchase

Recent Lower-Engagement

33.5%
Demographic Coverage
68 of 203 households

Segment Summary

CUSTOMER_SEGMENT	HOUSEHOLD_COUNT	CUSTOMER_SHARE_PCT	SALES_SHARE_PCT
Frequent Lower-Value	203.00	8.10	4.00
High-Value Active	806.00	32.20	62.10
High-Value Inactive	255.00	10.20	14.80
Low-Engagement Inactive	737.00	29.50	7.50
Occasional Higher-Value	189.00	7.60	7.40
Recent Lower-Engagement	310.00	12.40	4.10

Demographic Snapshot

Frequent Lower-Value
Coverage: 33.5% (68 of 203 households)

Age Group

45-54	39.71%
35-44	17.65%
65+	17.65%

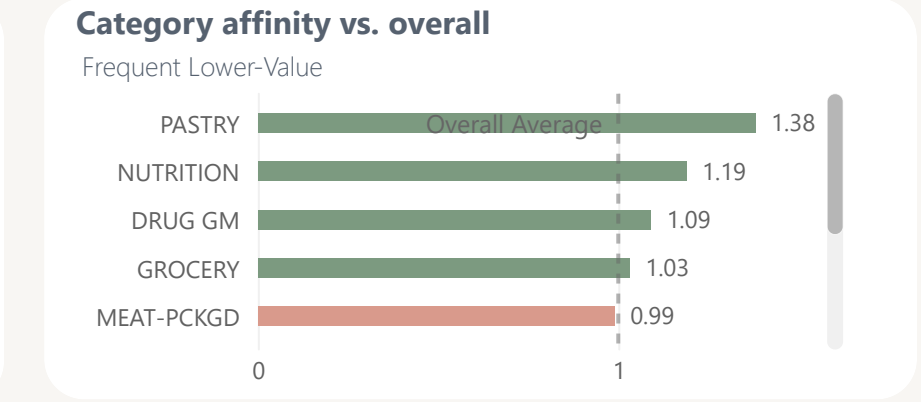

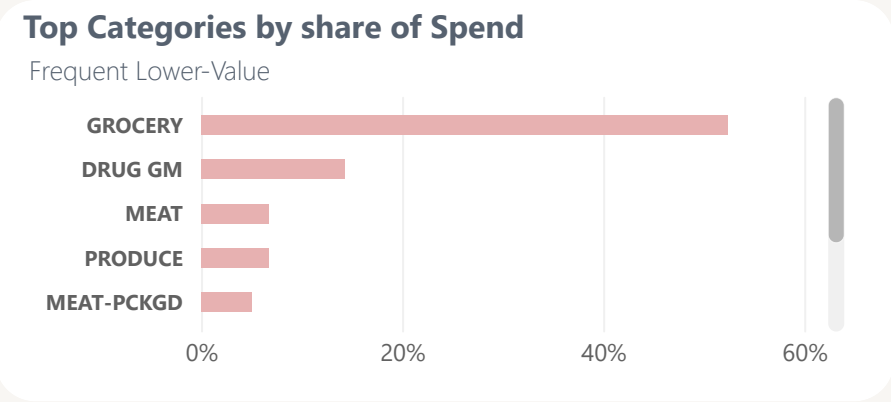

Household Composition

2 Adults Kids	26.47%
2 Adults No Kids	23.53%
Single Female	22.06%

Household Income

35-49K	30.88%
15-24K	20.59%

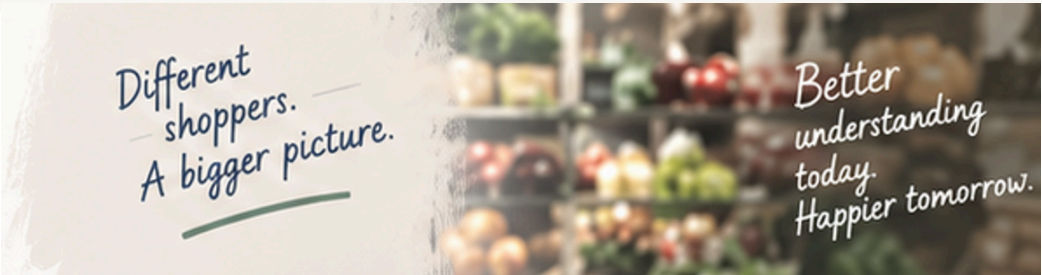

Demographic analysis is exploratory because coverage differs substantially by segment.

Retention & Lapse Analysis

Who is losing engagement, and who should we prioritize?

Recent behavior is compared with each household's historical shopping pattern to identify meaningful decline and potential lapse.

 **140**
Potential Lapse
5.6% of households

 **101**
Strong Decline
4.04% of households

 **5.60%**
Potential Lapse Share
of total customer base

 **22.35%**
High-Value Inactive Lapse Rate
57 of 255 households

 **£246.59K**
Historical Sales Represented
57 High-Value Inactive potential-lapse

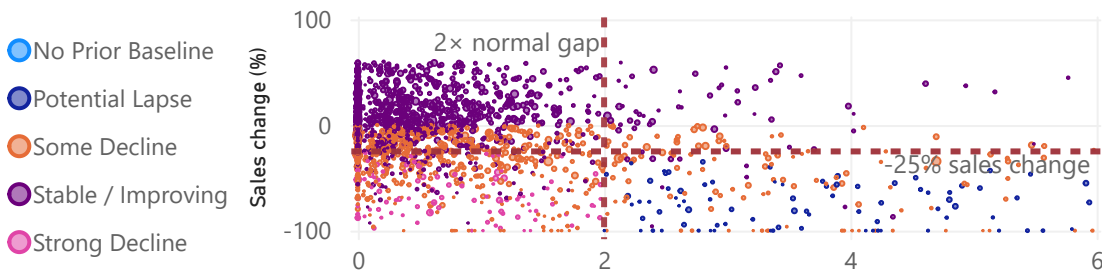

Potential Lapse rate by Segment

Percentage of households in each segment meeting lapse criteria.

Risk Scatter

Each bubble represents a household. Size = historical sales value. Color = engagement status.

Behavior Deterioration

Comparing recent behavior with each household's earlier baseline.

Lapse identification Criteria

Households are considered potential lapse if they meet all three rules.

- 1 Shopping days ↓ at least 50% and at least 3 shopping days lost
- 2 Sales value ↓ at least 25%
- 3 Current recency ≥ 2× the household's normal shopping gap

 **140 households**
meet all three conditions.

High-Value Inactive - Re-engagement Opportunity

A priority segment with high historical value and clear re-engagement potential.

 **57**
Potential Lapse

 **22.35%**
Share of Segment

 **£246.59K**
Historical Sales

 **£4.33K**
Avg. Historical Sales

At-Risk Household Detail

Sample of households meeting lapse criteria, sorted by recency vs normal gap.

Household	Segment	Status	Recency	Normal Gap	Recency vs Normal	Shopping Change %	Sales Change %	Historical Sales
232.00	High-Value Inactive	Potential Lapse	39.00	2.06	18.95	-78.13	-76	£12,695.57
149.00	High-Value Inactive	Potential Lapse	60.00	3.78	15.86	-50.00	-57	£11,920.93
2,318.00	High-Value Inactive	Potential Lapse	89.00	2.51	35.51	-90.00	-66	£10,685.72
2,007.00	High-Value Inactive	Potential Lapse	66.00	2.75	17.50	-62.61	-75	£9,922.93

Campaign Performance & Coupon Response

Understanding CRM reach, campaign response and coupon redemption across customer groups.

Comparing campaign types, response behavior and redemption outcomes across 30 campaigns and 2,500 households.

30

Total Campaigns

5 Type A | 19 Type B | 6 Type C

7,208

Household Campaign Assignment

All household-campaign exposure records

1584

Campaign-assigned Household

63.4% of all households

434

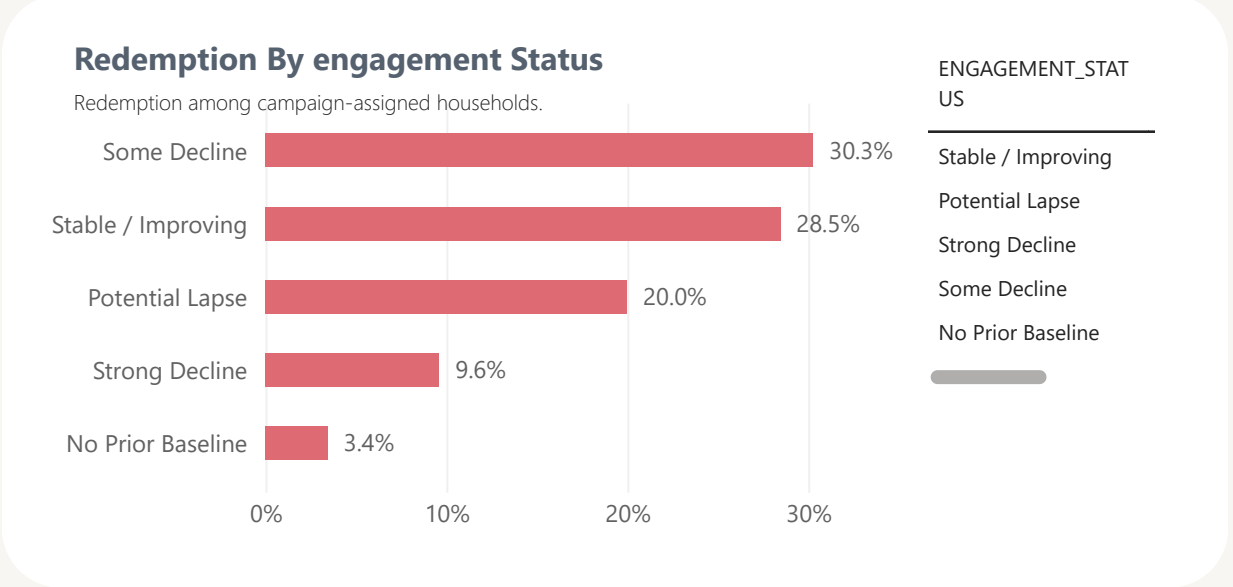

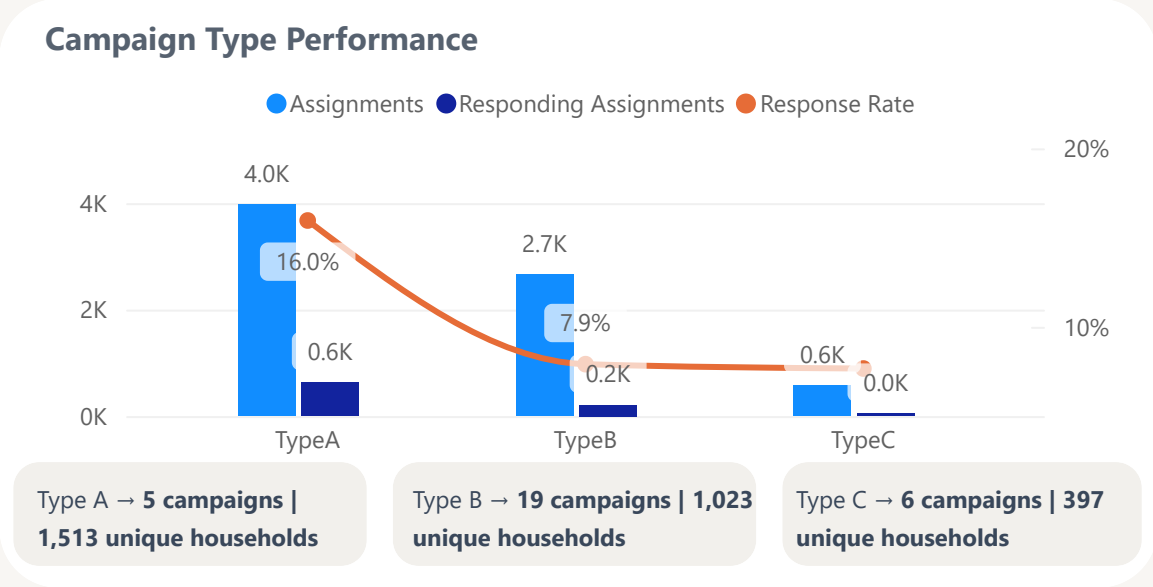

Redeeming Households

27.4% of assigned households redeemed

12.3%

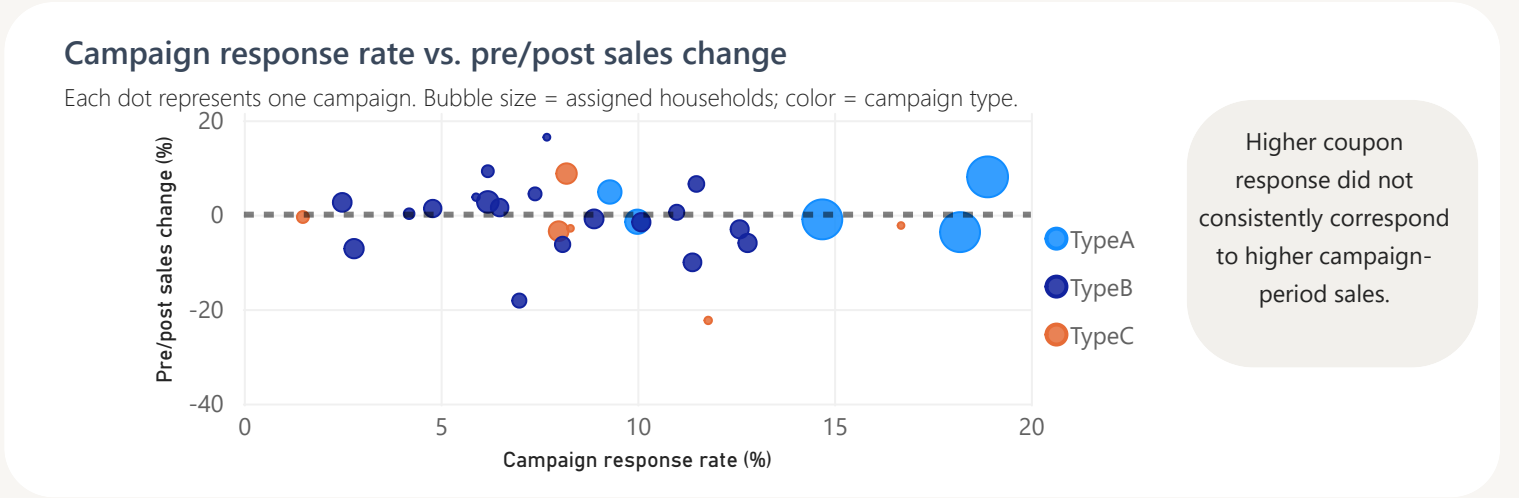

Assignment Response Rate

889 responding assignments

Response by Customer Segment × Campaign Type

CUSTOMER_SEGMENT	TypeA	TypeB	TypeC
Frequent Lower-Value	4.8%	6.5%	0.0%
High-Value Active	20.5%	9.1%	8.8%
High-Value Inactive	12.9%	5.6%	5.9%
Low-Engagement Inactive	4.0%	0.0%	0.0%
Occasional Higher-Value	12.3%	4.3%	3.0%
Recent Lower-Engagement	3.8%	3.0%	0.0%

CRM Opportunities & Recommendation

Turning customer insights into targeted CRM actions.

- 01 Overview
- 02 Segmentation
- 03 Retention & Lapse
- 04 Campaigns
- 05 Opportunities

14

Priority re-engagement households

£74.46K

Historical sales represented

£5.32K

Average historical sales per household

57.71

Average recency

1

Re-engage high-value lapse customers

Target the 14 High-Value Inactive customers who are Potential Lapse and have previously redeemed coupons with personalized win-back offers.

Key figures

14 households

£74.5K historical sales

£5,318.64 avg historical sales per household

57.7 days avg recency

2

Personalize offers using known purchase behavior

Use customers' historic category preferences to decide what to offer rather than sending generic promotions.

Top categories for this audience

- Grocery (100%)
- Produce (100%)
- Drug GM (100%)
- Meat-Packaged (100%)
- Meat (92.9%)

3

Test cross-sell and bundle opportunities

Use basket analysis to identify products that are often purchased together and test targeted bundle offers in CRM campaigns.

Top cross-sell opportunities (from basket analysis)

Category Pair	Support	Confidence	Lift
CAT FOOD + CAT LITTER	51.0%	1970.0%	16.88
DRY NOODLES/PASTA + DRY SAUCES/GRAVY	65.0%	1180.0%	4.60
CHEESE + DELI MEATS	285.0%	1540.0%	2.27

High lift alone is not enough - useful CRM bundles need both strong association and meaningful scale.

Test -> Measure -> Learn

Use a control/holdout group to measure reactivation, shopping frequency, basket value and incremental response.
